OUR INDIA FOUNDATION

TAKE A STAND LEND A HAND

OUR INDIA FOUNDATION

Rural India especially villages of North India lags behind in all social indices like Health care, Education, Sanitation and Livelihood opportunities. It is on this backdrop that the activists working in various NGO's of Kerala have come together to extend an helping hand to their fellow countrymen through a collective by name, Our India Foundation. It is an earnest attempt to pass over all the positive achievements Kerala have made on the human development front to the needy villages of India. On the educational front , the first of the schools it plans to set up in north India is coming up in Kandla ,of western Uttar Pradesh.

FUTURE PROJECTS

SCHOOLS

A network of primary schools are planned in the needy villages of India. First primary school by Our India Foundation has opened at Kandla on July 9th 20014. LKG, UKG and First standard classes with a total strength of 125 students, which includes 13 Orphans , 29 Riot victims ,18 BPl and 65 APL students,

HUMAN RESOURCE CENTRE

The dropout rate of school students belonging to the minority community in the district of Shamli is alarming. These youngsters with no prospects of future often end up in a cesspool of vices. This trend among the students by and large hold true for the rest of the region. A network of night schools is also planned in a big way making use of the available infrastructure in the villages equipping the students in National open school syllabus. The human resource centre will also conduct general orientation classes and camps for youth and social workers.

A college with the affiliation of the Meerut University awarding graduate and postgraduate degrees in social work is also envisaged under the human resource development centre.

HEALTH CLINICS

Absence of access to quality health care is a serious issue in the northern part of India. Heath is clearly not the mere absence of disease. Good health confers on a person or groups freedom from illness. Our India foundation plans to set up a network of Child and maternity clinics in a phased manner in the Shamli district of western Uttar Pradesh.
